Purpose:

The International Mechanical Engineering Congress and Exposition (IMECE) is the largest research and development conference available to mechanical engineers. As part of development is the Student Leadership Training Seminar (SLTS) which builds leadership skills within chapter officers. The two officers attending will receive leadership training with the purpose of helping the chapter members. Attending the conference gives New Mexico Tech representation on the international level.

Personal Statements:

Jonathan Carrasco

IMECE and the Student Leadership Training is an excellent opportunity for the officers involved in the ASME organization to gain knowledge on how to better run our chapter. I plan on returning back from this conference with a better understanding on what ASME wants from its student chapters. I will be returning next year in a leadership role within the club. This conference is a valuable opportunity in that direction.

Joseph Martinez-Ponce

The reason I want to attend the ASME Student Leadership Training Conference (STLC) is so that I can gain more skills on how to be a successful leader. By gaining more leadership skills, I will be able to effectively lead my organization and learn new creative ways to bring in more members into my organization. I will also be able to pass down the skills I obtain to younger members of my organization so that they can lead it when I am no longer attending New Mexico Tech. The conference is also a great opportunity to meet the members of the ASME community.
