Kay K. Bjornen, Ph.D., is a 1980 graduate of New Mexico Tech with a BS in Chemistry. She retired in August 2022 from the Oklahoma State University (OSU) Library, where she was Assistant Professor and the Research Data Initiatives Librarian. Her responsibilities included teaching and consulting on research data management and data literacy.

She was the co-coordinator and a certified instructor for the OSU Carpentries, a volunteer-led organization for teaching coding and computing to beginners. She began her career as an analytical chemist and her interest in data and information began during her years as a corporate research manager when she had responsibility for organization and maintenance of research and technical records.
